## Uridan Waterless Urinals

*Environmentally smart with  
stunning Danish Design*

*Awarded the Green  
Plumbers Highly  
Commended Award  
Award for 2003*

Consideration of our environment is now of utmost importance and Building Owners, Designers, Architects and Specifiers are increasingly focussed on improving the water and energy performance of their buildings. Uridan Waterless Urinals function entirely without the use of water; saving millions of litres of water each year.

Management Solutions*

## Uridan Waterless Urinals

*Australia's leading brand*

Uridan urinals are widely acclaimed for their simplicity of design, odour free operation, and low operating costs.

Uridan Waterless Urinals are significantly cheaper to purchase, install and maintain, when compared to normal flushing systems. In addition, huge water savings and the associated reduction in carbon emissions mean that property owners can improve the environmental rating of their buildings.

The savings in water are clear. Uridan Waterless Urinals use no water for flushing. The cleverly designed waste trap is connected directly to the sewer system and a biodegradable blocking fluid creates a perfect seal blocking any urine odours.

### Benefits of Uridan Waterless Urinals

- 💧 Huge water savings
- 💧 Low operating costs
- 💧 In-built trap with biodegradable fluid seal
- 💧 Easy installation (new and retro-fit installations)
- 💧 Odourless operation
- 💧 Increased hygiene
- 💧 No plastic cartridges, rubber bladders or deodorising cubes required

Uridan waterless urinals are available in standard, compact, pedestal, portable and trough versions.

*The images below show the Uridan Waterless Urinals installed in a sports stadium, a school, an office tower and an airport.*
