

**SmartMeter**  
SYSTEM  
from Watersave

## SmartMeter System

*Monitoring water online*

Do you know how much water your organisation uses, where you use it and how much water you could save?

The SmartMeter System provides businesses with water usage data, water analysis and a reliable and cost effective way to reduce water consumption, wastage and costs.

Management Solutions*

# Water Monitoring and Water Reporting

24 hour access to water data via the internet

## Simple cost effective water management

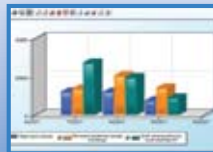

The SmartMeter System provides the reporting your business needs to measure, monitor and manage water consumption data, helping you to save water and money.

The SmartMeter System enables you to access your water usage data quickly and easily through a secure website. Your base flow rate is available immediately and any unusual usage patterns are easily identified. Having access to historical data allows you to understand your water consumption and to fix any problems before they get out of hand.

The SmartMeter System is the simple water management solution providing accurate data for analysis and sustainability reporting.

## Key features of the SmartMeter System

- 💧 Water usage displayed in 15 min time intervals
- 💧 Immediate notification of abnormal water usage via SMS and email
- 💧 Multi-site comparison of water usage data
- 💧 Water usage calculator per person
- 💧 Water savings and cost calculator
- 💧 Base-flow analyser
- 💧 Asset Register containing map locations of water meters, connection status, and type and calibration of meters
- 💧 Rich variety of graphing tools including 3D visualisation, panning and zooming.
- 💧 Download water usage data directly to MS Excel for offline analysis
- 💧 Solar powered logging devices
- 💧 Integration with TCA WebGraphs for energy and water analysis
